Special Issue

Advances in Data Management

Message from the Guest Editors

This Special Issue will include selected papers from the ADBIS'2024 and IDEAS'2024 conferences, which will take place at Bayonne/France during the 28–31 of August 2024. However, this call is open to papers that have not been included in the program of the above conferences. The main objective of this Special Issue is to provide an outlet to host novel research papers, innovative applications, and tool reports on the greater area of Data Management, which includes databases, information systems, data science, artificial intelligence, and machine learning. All papers will be reviewed by international experts according to the standard practice of *Digital*/MDPI. It is emphasized that if a submitted paper has been presented earlier in any conference, then this should be clearly stated with a footnote on the first page. Moreover, the new submission must include at least 30% novel, non-trivial material with, for example, new extra algorithms, experimentation results (not just an extended literature survey, etc.). The submission deadline is the 31st of December 2024.

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:
indexed within Scopus, EBSCO, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is
provided to authors approximately 23.6 days after
submission; acceptance to publication is undertaken in 4.1
days (median values for papers published in this journal in
the first half of 2024).
