

Special Issue

Chronic and Infectious Diseases

Message from the Guest Editor

Because of epidemiological transition and demographic changes, many nations are still facing many infectious diseases and gradually transitioning to chronic and noncommunicable diseases. Based on the double burden of chronic and infectious diseases globally, researchers and health planners are continuously striving to reduce or eliminate infectious diseases using vaccines, identifying newer antimicrobials in the face of the increasing problem of drug resistance, educating people in preventive measures and personal hygiene, and early and effective screening for both infectious and chronic diseases. This Special Issue welcomes original articles, brief reports, and review articles describing research findings on epidemiology, pathogenesis, management, treatment algorithms, clinical trials, microbial agents, etc. on infectious diseases. Also, it provides a forum in which researchers from a wide variety of disciplines can report their findings in a number of chronic and noncommunicable diseases and conditions, including population-based interventions of chronic diseases, minority health, health disparities, and disease prediction models.

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
