Message from the Editor-in-Chief

Emergency Care and Medicine is an open-access, scientific, peer-reviewed electronic journal for those who provide immediate, emergency, and urgent care, manage Emergency Medical Service systems, or are engaged in fundamental, clinical, and epidemiological research work, literature reviews, audits, and quality improvement programmes. The journal will also benefit anyone who is interested in learning more about acute care and emergency health care services.

We carefully consider the submitted manuscripts, which cover any aspect of acute medical and surgical care. Therefore, the four-word phrase “broad scope, narrow focus” characterises the journal well.

Our mission is to disseminate scientific articles and, in doing so, provide the global medical community with information on developments, advances, trends, patterns, insights, and education in acute care.

Our Editorial Board is open to passionate professionals, and we have a well-defined incentive system for reviewers. We accept free-format submissions and welcome submissions from all continents, countries, and territories.

Editor-in-Chief

Prof. R. Lunevicius

Aims

Emergency Care and Medicine (ISSN 2813-7914) is an open-access journal that disseminates rigorously peer-reviewed publications regarding all research areas of emergency medicine and surgery. It publishes review and overview articles, reports of original investigations, research and audit protocols, clinical guidelines, brief reports, editorials, viewpoints, commentaries to the accepted or published papers, and letters to the editor. Only high-quality information for patients can be published on the journal's patient page. Special interest will be given to papers which bring new insights to specific communities. We encourage scientists and medical practitioners to publish their experimental and clinical work results in as much detail as possible. The details of the studies must be provided according to FAIR principles (go-fair.org/fair-principles/) so that the results can be reproduced. To enhance the quality and transparency of health research, we recommend following reporting guidelines published at equator-network.org.

Scope

- Prehospital medicine;
- Emergency and urgent hospital medicine and nursing;
- Emergency and urgent general (acute care) and specialised surgery;
- Trauma and injury;
- General and specialised critical care medicine;
- Global emergencies;
- Tropical medicine emergencies;
- Extreme medicine;
- Polar medicine;
- War medicine and public health;
- Epidemiology of acute illnesses and injury;
- Emergency medical services systems.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures, or use of colors

Rapid Publication

First decisions in 18 days; acceptance to publication in 4 days (median values for MDPI journals in the second half of 2024).
