

Special Issue

Econometric Models of Network Data

Message from the Guest Editors

This Special Issue aims to publish theoretical and empirical contributions where the main contribution is on network data structures within econometric models. Specific topics of interest are dyadic data, centrality measures, graph theory, peer effects, clusters, multivariate panel data techniques, agents-based models, and other related topics.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Guglielmo Maria Caporale
Department of Economics and Finance, Brunel University of London,
Kingston Lane, Uxbridge UB8 3PH, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), EconLit,
EconBiz, RePEc, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 29.6 days after
submission; acceptance to publication is undertaken in 7.9
days (median values for papers published in this journal in
the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
