

Special Issue

Human Capital Development in Africa

Message from the Guest Editors

Human capital development is critical for fostering sustainable economic growth and enhancing social welfare in the developing world, particularly in the context of African countries where the quality of education, health services, and skill development has been a major challenge. This Special Issue of *Economies* aims to bring together rigorous empirical analyses and innovative theoretical frameworks that focus on the complex and diverse aspects of human capital development. Anchored in relevant theories, the papers included in this Issue will utilize relevant econometric techniques and computable general equilibrium models to address the critical challenges and opportunities facing human capital in Africa. We look forward to receiving positive responses to this Special Issue and express our gratitude for the opportunity to contribute to the esteemed journal *Economies*.
