

Special Issue

Advances in Electrical Engineering from EU-Funded Horizon 2020 Projects

Message from the Guest Editors

Horizon 2020 is the biggest EU Research and Innovation program ever, with nearly EUR 80 billion of funding available over 7 years until 2020. Electrical engineering is one of the key fields of research and innovation for industrial leadership and energy transition in the work program proposed and, therefore, the results and insights of these projects will contribute significantly to society. This Special Issue aims to give researchers in Horizon 2020 projects related with electrical engineering the opportunity to publish under open access conditions. The contributions cover the one or a combination of the following points:

- Literature reviews on relevant subjects of the projects, including problem formulation;
- Methodologies and proposal of solutions for problems. Demonstration of the solutions by simulation;
- Insights and results of demonstration activities in different environments (experimental and piloting);
- Economic and business models in relation with the solutions proposed. Regulation studies and recommendations.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Andreas Sumper
CITCEA-UPC, Department of Electrical Engineering, Universitat
Politecnica de Catalunya, 08028 Barcelona, Spain

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27.9 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).

Journal Rank:

CiteScore - Q2 (Electrical and Electronic Engineering)
