

## Special Issue

# Digital Signal and Image Processing for Multimedia Technology

### Message from the Guest Editors

Determining how to employ deep learning technology has become a primary research topic in numerous fields. These include, for example, image processing, computer vision, the Internet of Things, natural language processing, and multimedia processing. In addition, due to the increasing process power of electronic devices and the expansion of network transmission bandwidth, deep learning models have begun to be embedded in various edge devices for application in several fields, such as automobiles, transportation, education, manufacturing, and many others. We invite authors to submit original research articles and review articles related to the application of deep learning techniques in image processing and edge devices. Topics of interest in this Special Issue include, but are not limited to the following:

- Machine learning and deep learning for image processing and computer vision;
- Deep learning algorithms for clustering and classification
- Deep learning algorithms for segmentation and data annotation
- Embedded multimedia applications for edge computing
- Novel applications in robotic vision and intelligent consumer electronics
- Application architecture of AI-based systems

---

### Guest Editors

Dr. Chi-hung Chuang

Department of Information and Computer Engineering, Chung Yuan Christian University, Taoyuan City 320314, Taiwan

Prof. Dr. Chih-Lung Lin

Graduate Institute of Intelligent Robotics, Hwa Hsia University of Technology, New Taipei City 235, Taiwan

---

### Deadline for manuscript submissions

15 January 2025

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
