

## Special Issue

# Recent Advances in Computer Security and Online Privacy

### Message from the Guest Editors

Many different solutions in computer security and online privacy have been proposed to address the issues in emerging technologies and overcome the battle of networks, optimization in distributed environments, learning, and other aspects using numerous technologies. However, they are not properly designed to address the emerging needs of society. Therefore, the use of computer security and online privacy for emerging technologies is the key factor. We solicit original contributions on novel computer security and online privacy approaches and their recent advances related to security and privacy, the use of blockchain, and applications of verifiable random functions for effective data transfer in emerging technologies. To meet the requirements of present technologies, blockchain and verifiable random functions should be an efficient and safe way to achieve computer security and online privacy over the network. This Special Issue focuses on computer security and online privacy for emerging technologies, addresses challenges, and presents effective solutions and recent advancements in the direction of computer security and online privacy considering the growing technological era.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
