

## Special Issue

# Electrical Power Systems Quality

### Message from the Guest Editors

Over the last decade, power quality (PQ) has garnered significant attention for a number of fundamental reasons. First and foremost, assured power quality is a product that provides benefits for both customers and the grid operators. In this dynamic environment, it is critical to monitor, maintain, and enhance power quality levels to ensure compatibility between producers, consumers, and the entire energy power system. In order to improve the power quality in microgrids and smart grids, active power filters, inverters, and other power-electronics-based equipment is needed for the development of superior controllers. New challenges arise due to the emissions from these new devices, which either produce or consume energy and are connected to the transmission or distribution network, particularly those that have an active power electronics interface; new smart distribution applications, like demand-side management, feeder reconfiguration, and Volt/VAR control; and the increased sensitivity of modern installations used by producers or end users. We invite cutting-edge research and both theoretical and experimental studies exploring recent advances in this field.

---

### Guest Editors

Dr. Georgios Fotis

Department of Electrical and Electronic Engineering Educators,  
ASPETE—School of Pedagogical and Technological Education, 14121 N.  
Heraklion, Greece

Prof. Dr. Michael Mann

Renewable Power Systems Lab, Aschaffenburg University of Applied  
Sciences, 63743 Aschaffenburg, Germany

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
