

## Special Issue

# Recent Developments and Applications of Image Watermarking

### Message from the Guest Editor

Watermarking of multimedia products is essential for copyright protection, authentication, and so on. For several decades, watermarking schemes have been successfully developed, particularly for the digital and network environment, sometimes combined with cryptography schemes. This Special Issue is dedicated to recent developments and applications of image watermarking. It aims to address a large variety of data-hiding issues involving conceptual developments as well as dedicated applications. Proposals mixing cryptography, deep-learning approaches and, more generally, artificial intelligence techniques are welcome. The Special Issue will bring together researchers and practitioners from different research fields, including data hiding, signal processing and cryptography, who wish to make original research contributions.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2024).
