

## Special Issue

# Intelligent Data Sensing, Processing, Mining, and Communication

### Message from the Guest Editor

*Electronics* invites manuscript submissions in the area of intelligent data sensing, processing, mining, and communication. It is important to develop smart methods to detect, collect, explore (mine), and communicate data. This will reduce the workload of those who use said data. In addition, the scale of detection, collection, and dissemination of data could increase. Mobile devices, in particular, are equipped with various detection devices. Other relevant aspects should also be investigated, such as computing effort, platforms, tools, service discovery, data management, and analytics for intelligent data collection and communication. The scope of this Special Issue covers various real-world problems and their appropriate innovative solutions and recent advancements in the field of intelligent data detection, collection, mining, and communication, including (but not limited to):

- Data Processing
- Data Mining
- Communication
- Internet of Things
- Cloud Computing
- Fog Computing
- Blockchains
- Security
- Privacy
- Artificial Intelligence
- RFID

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
