

## Special Issue

# Autonomous Control of Unmanned Aerial Vehicles

### Message from the Guest Editor

Unmanned aerial vehicles are being increasingly used in different applications in both military and civilian domains. Operating unmanned flying vehicles is useful yet it can be challenging when the vehicle interacts with the environment. This interaction could be, for instance, in the form of landing on ground or landing pads, docking into a station, approaching terrain for inspection, or approaching another aircraft for refueling purposes. Thus, it is important to find effective and flexible strategies to enable vehicles to perform such tasks autonomously. Classical features of autonomous control design involve stability enhancement and waypoint flight. However, new requirements in the recent development of UAVs demand robust and adaptive control techniques for different flight conditions, aggressive maneuvers, use of non-traditional sensors such as cameras, obstacle avoidance, fault detection, fault tolerant control, etc. To achieve these ambitious requirements, systematic and innovative methods are required. We invite original contributions, as well as review papers in this area.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
