

## Special Issue

# Power Converters for Renewable Energy Integration and Energy Storage Systems

### Message from the Guest Editors

The growing demand for sustainable energy solutions is driving rapid advancements in renewable energy sources (RESs) and energy storage system (ESS) technologies. Central to these advancements are power electronic converters, which play a critical role in ensuring efficient, stable, and reliable energy conversion between RESs, ESSs, and the grid. This Special Issue aims to bring together innovative research and insights into the design, optimization, and application of power converters in these evolving energy landscapes. Topics of interest include but are not limited to the following: Novel converter topologies for RES and ESS integration; Innovative control strategies for power converters integrating RESs and ESSs; Grid-feeding, grid-supporting, and grid-forming power converters with distributed resources; Power converters for fast-charging infrastructures in electric vehicles; High-efficiency converter designs for distributed generation; Harmonic and power-quality improvements in energy systems; Converter reliability and fault tolerance; Power converters' roles in enhancing the stability and flexibility of the grid.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
