

Special Issue

Wireless Sensor Network: Latest Advances and Prospects

Message from the Guest Editor

In recent decades, there has been a tremendous growth in wireless sensor networks, especially due to the technological advancements and the challenges of Internet of Things (IoT). Wireless IoT devices can be flexibly deployed in the target region to sense and collect relevant information. The topic of the special issue include:

- Wireless sensor networks and their applications;
- Novel architectures, protocols, and algorithms for wireless sensor network applications;
- Communication platforms and access technologies;
- Theoretical modelling and frameworks for wireless sensor network applications;
- Case studies, real solutions, designs, and implementations;
- Resource allocation techniques;
- Measurements and transmission in wireless networks;
- Security and privacy frameworks for wireless sensor network applications;
- Innovative techniques for wireless sensor network security applications;
- Environmental challenges;
- Solutions for smart transport and traffic;
- Solutions for smart mobility and parking.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and
Systems Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the first half of 2024).
