

## Special Issue

# Electromagnetic Scattering Theory and Its Applications

### Message from the Guest Editors

It is crucial to analyze the propagation and scattering phenomena of electromagnetic (EM) waves at any frequency. Moreover, the current trend in exploring higher and higher frequencies calls for a refined stochastic description of the scattering surfaces roughness. This Special Issue is aimed at providing insight and addressing recent breakthroughs in the wide field of scattering of EM waves as well as investigating innovative solutions and approaches to scattering problems in different scenarios. *Development of analytical, statistical, empirical scattering models; Measurements of scattered electromagnetic waves and radar cross-section; Algorithms for the evaluation of the EM scattering; Scattering models in remote sensing; Surface and volume scattering; Models, methods and tools for inverse scattering; Metamaterials, metasurfaces and plasmonics; RFID technologies; Radiowave and Terahertz propagation; Scattering in electronic circuits; Guided propagation; Scattering from humans and objects; Scattering in biomedical applications; Electromagnetic compatibility; Numerical methods for EM scattering*

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
