

Special Issue

The Future of Nuclear Power for Clean Energy Systems

Message from the Guest Editors

Currently, many countries are developing nuclear energy as a result of rapidly changing global political and economic conditions. Research and development in this field focus on a number of aspects related to the operation of nuclear power plants in the power system, nuclear security and safety, new reactor technologies, the nuclear fuel cycle, and many others. These issues undoubtedly constitute a research topic for many scientific groups all over the world. In connection with the above, we decided to establish a Special Issue for *Energies* entitled “The Future of Nuclear Power for Clean Energy Systems”. We invite all authors to publish scientific papers on nuclear energy and its future role in energy systems. This Special Issue will guarantee dissemination of innovative knowledge to a wide audience, thus facilitating the conduct and harmonization of nuclear energy research.

Guest Editors

Dr. Mikołaj Oettingen

Dr. Paweł Gajda

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
