

Special Issue

Hydrocarbon Recovery Technologies for Fractured Unconventional and Tight Reservoirs

Message from the Guest Editors

To further unlock the oil and gas production potential from unconventional/tight formations, this Special Issue aims to bring together experts in the field of unconventional reservoir development to share their knowledge, experiences, and latest advancements in the area. We invite investigators to submit original research articles, case studies, and review papers to address the most significant challenges and exchange ideas on hydrocarbon recovery technologies for these unconventional resources. Potential topics of interest include, but are not limited to:

- Fractured reservoir modeling and simulation;
- Improved and enhanced oil recovery (IOR/EOR) technologies;
- Analysis of production behavior in unconventional/tight reservoirs;
- Field observations of fracturing, refracturing, and EOR operations;
- Hydrocarbon flow mechanisms in unconventional/tight reservoirs;
- Data analytics and artificial intelligence for unconventional reservoirs;
- Advanced fracture characterization and modeling;
- Reservoir and production monitoring technologies.

Guest Editors

Dr. Lu Jin

Dr. Xincheng Wan

Dr. Shaojie Zhang

Dr. Nicholas A. Azzolina

Deadline for manuscript submissions

15 January 2025

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
