

## Special Issue

# Advanced Energy Technologies and Energy Savings: Low Emissions and High Efficiency

### Message from the Guest Editors

This Special Issue aims to provide a platform for showcasing the latest advancements and innovations across a broad spectrum of energy technologies, from renewable energy systems to traditional coal-fired power plants. Topics of interest for publication include, but are not limited to:

- Advanced wind energy conversion systems and turbine technologies;
- Innovations in solar photovoltaic and solar thermal energy systems;
- Biomass and bioenergy technologies for clean energy production;
- Hydrogen production, storage, and utilization in energy systems;
- High-efficiency and low-emission coal-fired power generation (HELE) technologies;
- Carbon capture, utilization, and storage (CCUS) for coal and other energy systems;
- Renewable energy integration and optimization strategies;
- Advanced energy storage technologies for grid stability and flexibility;
- Smart grid technologies and energy management systems;
- Energy-efficient materials and designs for renewable and conventional systems;
- Policy, economic, and social analyses of energy-saving technologies.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
