

## Special Issue

# Advances in Machine Learning Applications in Modern Energy System

### Message from the Guest Editors

Energy systems are designed in diverse ways depending on the field of application. Further requirements, like environment impact or energy awareness, are also considered, which led to a transformation of the design into more complex systems such as smart grids, renewable energy systems or building management systems. Many machine learning methods exist, ranging from neural networks, deep learning, and ensemble models to hybrid solutions that attend to the problems present in these complex systems. The application in energy systems can provide additional features to make them more effective; for instance, a better knowledge of the system, support decisions for an effective energy management or early fault detection. Topics of interest for publication include, but are not limited to:

- Energy estimation;
- Prediction models;
- Energy system modeling;
- Load forecasting;
- Condition monitoring;
- Energy disaggregation;
- Fault detection;
- Optimization;

---

### Guest Editors

Dr. Daniel Pérez-López

Suppress Research Group, Escuela de Ingenierías, Universidad de León, 24007 León, Spain

Dr. Fernando Sánchez Lasheras

Department of Mathematics, Faculty of Sciences, Oviedo University, Calle Leopoldo Calvo Sotelo 18, 33007 Oviedo, Spain

---

### Deadline for manuscript submissions

closed (3 June 2024)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
