

Special Issue

Energy Efficiency and Energy Performance in Buildings

Message from the Guest Editor

In order to achieve carbon-neutral economies, it is crucial to improve the energy efficiency performance of the built environment, as well as integrated on-site power generation from renewable energy sources. This Special Issue aims to present and disseminate the most recent advances related to the design, retrofit, modelling, control, and energy assessment of building systems. Topics of interest for publication include, but are not limited to, the following:

- Optimal design and retrofit strategies of carbon-neutral buildings;
- Innovative materials suitable for energy-efficient buildings;
- Highly efficient systems for heating and cooling buildings;
- Smart and dynamic systems to enhance energy-efficient buildings;
- Modular construction and retrofit techniques of energy-efficient buildings;
- Building systems that can integrate on-site power generation from renewable energy sources;
- Advanced modeling and analysis approaches for building energy systems;
- Measurement and monitoring techniques for the energy assessment of buildings;
- Cost-benefit analysis techniques for designing and retrofitting building energy systems.

Guest Editor

Prof. Dr. Moncef Krarti

Building Systems Program, Civil, Environmental and Architectural Engineering Department, University of Colorado Boulder, Boulder, CO 80309, USA

Deadline for manuscript submissions

25 April 2025

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
