

Special Issue

Energy Transition in the Regions—Goals, Determinants, Diversification and Sources of Financing

Message from the Guest Editors

In order to mitigate climate change and promote green and blue energy, this research needs to be moved from the macro level to a regional level, where beneficial changes can be set in motion. In this context, the purpose of this Special Issue combines many aspects that are guided by rapid developments at a regional level. Current research gaps should be addressed with a strong synergy of economic, technological, management, and financial factors to show the new face of climate-friendly regions that support and use green and blue energy. We invite you to contact the directly and submit proposals for manuscripts to contribute to this Special Issue.

Guest Editors

Prof. Dr. Beata Zofia Filipiak

Prof. Dr. Dorota Wyszowska

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
