

Special Issue

Advanced Technologies for Biomass

Message from the Guest Editors

The use of biomass or organic waste material as primary resources for the production of fuels, chemicals, or electric power is gaining in importance due to the environmental issues correlated with the use of fossil fuels. This Special Issue invites papers that consider the various aspects of sustainability in biomass conversion to valuable products, covering all the technical chains from biomass production to residue management and, in particular, experimental and simulation works that investigate new processes and technologies at industrial, pilot, and bench scales. Topics of interests include, but are not restricted to:

- New biomass resources
- Advanced processes for energetic conversion of biomass
- Bioplastic production
- Biofuel production
- Biomass pretreatment, like hydrothermal carbonization or torrefaction
- Residue management after biomass conversion
- Life cycle assessment

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
