

## Special Issue

# Sustainable Development and Spatial Policy for Renewable Energy Systems

### Message from the Guest Editors

The development of renewable energy systems needs to step up its investment in energy efficiency and renewable technologies, also bringing along technical and business challenges. However, the transition to a low-carbon and sustainable economy can be a difficult and costly process requiring techno-economic assessments. This Special Issue of *Energies* aims at deepening the understanding surrounding renewable and sustainable energy systems, and the relationships between spatial planning and renewable energy investments. This Special Issue welcome research topics include the following:

- Renewable energy investments and sustainable development;
- The role and place of renewable energy investments in spatial development plans at different levels;
- Planning for the commission and decommission of renewable energy installations;
- Renewable energy investments and the demand for flexibility in planning;
- Environmental protection, policy and renewable energy investments;
- Statutory changes in different countries regarding the planning basis for renewable energy investments;
- Spatial conditions for the implementation of distributed energy in individual countries.

---

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
