

Special Issue

Recent Advances in Internal Combustion Engines

Message from the Guest Editor

This Special Issue of *Energies* seeks top-quality papers dealing with recent advances in ICE technology. Original research, review, and case study articles can be submitted. Topics of primary interest include but are not limited to:

- Combustion methods;
- Waste heat recovery;
- Gas exchange;
- Aftertreatment;
- Thermal management;
- Alternative fuels;
- Engine modeling;
- Engine tribology;
- Engine and platform control;
- Electrification.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief
