

## Special Issue

# Thermal Comfort, Indoor Air Quality and Human Health in Buildings

### Message from the Guest Editors

The main aim of this Special Issue is to highlight the impacts of ventilation and air conditioning on indoor air quality and to summarize the most important activities in this field to provide a better understanding of the main concepts related to indoor air quality and human health. We are seeking articles considering the different challenges related to occupant health and energy use, such as:

- HVAC technologies for thermal comfort and indoor air quality control;
- Human health issues related with energy usage;
- Internal comfort in different climates and its impact on energy;
- Air filtration and air purification techniques;
- New methodologies and technologies to identify indoor air quality problems;
- Measurements and monitoring of physical, chemical, and biological indoor and outdoor parameters;
- Thermal comfort and indoor air quality in special spaces (nurseries, classrooms, etc.);
- Outdoor air quality relevant to indoor air quality.

---

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
