## Special Issue

# Intelligent Management and Control of Energy Storage Systems

## Message from the Guest Editors

Energy storage is the key technology to achieve stable and consistent power delivery, and to address the challenges associated with modernizing the power grid. In the meantime, energy storage systems (ESSs) have also been playing a key role in end-user electrification. This is evident from the proactive penetration of batterypowered electrical vehicles (EVs) in pursuit of an efficient and low-carbon society. This vision has driven intensive studies on the development of advanced ESSs that combine performance and cost merits, while suitable management and control strategies are pivotal to enhance the overall safety, reliability, and cost efficiency[DM1]. The Special Issue, therefore, seeks to contribute to the energy storage agenda through enhanced scientific knowledge related to intelligent management, control, power electronics, and novel ESSs with application in a wide range of fields like EVs. power grids, distributed generation, etc.

## **About the Journal**

## Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

## **Journal Rank:**

CiteScore - Q1 (Control and Optimization)
