

Special Issue

Novel Technologies for Metal-Ion and Metal Batteries

Message from the Guest Editors

For this Special Issue, we encourage the submission of relevant papers (short communications, and full, progress, or review articles) focusing on electrochemistry studies and physicochemical characterisations of active materials, electrolytes, separators, binders, conductive additives, and current collectors, and their degradation processes for battery application. We encourage submission of papers focused on the main challenges related to material deterioration, interfacial instability, and battery components compatibility for Li-ion and post-Li-ion batteries such as Li metal, Li-S, and Li-air, as well as post-Li technologies such as Na-ion, Na-S, Na-air, Al-ion, Al-S, Al-air, K-ion, Mg-ion, Mg-S, Mg-air, Zn-ion, Zn-air, and Ca-ion. Additionally, manuscripts discussing novel (i) electrochemical protocols, (ii) processes for electrode preparation, and (iii) electrochemical techniques for battery analysis will also be strongly considered for publication.

Guest Editors

Dr. Rinaldo Raccichini

Dr. Ivana Hasa

Dr. Giuseppe Antonio Elia

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
