

Special Issue

Waste Management and Circular Economy in Regional Development and Planning

Message from the Guest Editor

The Special Issue concerns cases from different countries and regions with various challenges, determinants, and constraints and aims to bring together papers on the different aspects of implementing waste management and circular economy on a national, regional, and local scale, focusing on identifying wastescapes and examining resource flows in relation to spatial development challenges. These aspects concern mapping wastescapes to show evidence of the negative consequences of the linear economy, developing decision support models for the implementation of circular design solutions, policy and governance challenges, research methodology and knowledge transfer, and social issues regarding public acceptance and demographic determinants. Keywords:

- Waste flows
- Waste management
- Circular economy
- Regional planning
- Social awareness

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
