

Special Issue

Energy Market Analysis, Perspectives and Policy Simulation

Message from the Guest Editors

This Special Issue invites the publication of high-quality research papers that cover a wide range of topics, which are used to answer following questions:

- What are the possible scenarios for the developing European energy market?
- What are the impacts, costs, and financial risks of the various scenarios for energy market consolidation?
- What are the impacts, costs, and financial risks of energy market developments?
- Which technologies are most likely to contribute to the energy market development?
- What are the perspectives, forecasts, market size, and shares of the smart energy market?
- Is it possible to achieve the green energy deal 2030 in the context of the recent energy market developments?
- What should be the directions of legislative adjustments to support the processes of integration of the European energy market?
- What should be the directions of legislative adjustments in order to ensure the competitiveness of energy markets on an international level?
- How to support and strengthen the position of end users in the energy market?
- How to adjust energy supply patterns to support network stability?

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
