

Special Issue

Smart Energy and Sustainable Environment

Message from the Guest Editors

Smart energy is one of the most significant scientific and technological trends of our time, uniting the issues of energy efficiency, new energy sources and technologies for their production, intelligent control technologies and big data analysis. Challenges related to the sustainable environment include the research and widespread implementation of breakthrough technologies for smart cities, water and air quality by reducing harmful pollution, achieving the sustainable development of the environment, and the integration of artificial-intelligence-based security systems. Critical review articles, original research and case studies are welcomed in this Special Issue, covering relevant up-to-date topics related to energy and environmental technologies, as well as smart technologies for energy and environment management, including interdisciplinary methodologies.

Guest Editors

Prof. Dr. Valery Meshaklin

Dr. Petros Groumpos

Dr. Chirag Bhimani

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
