Special Issue

Smart Mobility and Energy Transitions

Message from the Guest Editor

Dear colleagues, Solar energy and biofuels, from urban metabolism waste, together with public and shared transportation, could pave the way towards a more sustainable mobility system that helps to ensure smart city targets. Biorefineries from urban metabolism waste streams, e.g., solid urban waste/urban wastewaters, can be explored for transport-related material building blocks and advanced biofuels. Papers are welcomed in the following areas:

- Plug-in hybrid and pure electric bus systems simulation and monitoring of PM2.5, NOx, NH3, and black carbon;
- Ethanol hybrid ED95 bus and flex-fuel vehicles simulation and monitoring of PM2.5, NOx, and NH3, and black carbon;
- Shared mobility systems and evaluation of their success in supressing conventional private modes;
- Low-cost sensor networks for traffic related air quality monitoring and historical trends;
- Biorefinery systems for sustainable transportation (biopolymers and biofuels from waste resources);
- Solar powered charging stations for e-mobility;
- Well-to-wheels of alternative transport systems.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
