

Special Issue

The Role of Spatial Policy Tools in Renewable Energy Investment

Message from the Guest Editors

Investment in renewable energy development is influenced by national spatial planning systems. It is the spatial policy tools, especially local spatial plans that create the framework for attracting and deploying investments—including such specific ones as energy investments. This Special Issue of *Energies* aims at broadening our understanding of the relationships between spatial planning and renewable energy investment. Key research topics include the following:

- The role and place of renewable energy investment in spatial development plans at different levels;
- Planning for commissioning and decommissioning of renewable energy installations;
- Renewable energy investment and the demand for flexibility in planning;
- Environmental protection and policy and renewable energy investment;
- Statutory changes in different countries regarding the planning basis for renewable energy investments;
- Spatial conditions for the implementation of distributed energy in individual countries;
- Renewable energy investments and sustainable development.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
