## Special Issue

## International Energy Trade

### Message from the Guest Editor

Energy is a critical input for each sector of the global economy fueling economic growth and development. The international energy trade underpins energy affordability, availability, and security issues, playing a crucial role in the energy transition. This Special Issue on "International Energy Trade" emphasizes the role of energy trade considerations in environmental & economic sustainability research. We invite research focused on developments that affect energy trade at regional or global levels providing insights about new resources, technologies, and regulations. Areas of interest include, but not limited to the following:

- The effect of new technologies and infrastructure projects on the international energy markets;
- The effect of new energy resources on interfuel substitution and trade dynamics;
- The effect of policy incentives on the energy technology mix and trade.

The Special Issue welcomes theoretical, applied, and empirical studies recognizing appreciating the diversity of methods and fact-based understanding.

### **About the Journal**

### Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

CiteScore - Q1 (Control and Optimization)
