

## Special Issue

# Sustainable Buildings: Heating, Ventilation and Air-Conditioning

### Message from the Guest Editors

Building energy is a core component of cities and urban planning and has major social consequences, as well as climate change impacts. Buildings worldwide account for a surprisingly high 40% of global energy consumption, and the resulting carbon footprint, significantly due to the increasing use of heating, ventilation, and air-conditioning (HVAC). Research and review papers of systems and technologies aiming to improve energy performance, air quality, and comfort are welcomed. Topics that could be covered include, but are not limited to the following:

- Low-energy ventilation
- Passive cooling and strategies
- High-performance HVAC
- Water heating and cooling systems
- Heat pumps
- Thermal comfort and air quality
- Control and operation
- Hybrid HVAC systems
- Integration with renewables
- Fault detection and diagnosis of HVAC systems
- Intelligent approaches
- Measurement and simulation methods
- Modeling and optimization
- Case studies and innovative approaches

---

### Guest Editors

Dr. John Kaiser Calautit

Architecture and Built Environment, University of Nottingham, Nottingham NG7 2RD, UK

Dr. Hassam Nasarullah Chaudhry

Architectural Engineering Discipline, Institute of Sustainable Building Design, School of Energy Geoscience Infrastructure and Society, Heriot-Watt University, Dubai P.O. Box 38103, United Arab Emirates

---

### Deadline for manuscript submissions

closed (20 February 2022)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
