

Special Issue

Sustainable Energy & Society

Message from the Guest Editor

Today, the sustainable supply of energy resources is seen, worldwide, as the key determinant of both economic and social development. “Sustainability”, in this particular context, combines two important notions – “stability” [of energy supply] and its friendliness to the natural environment. Societies across the globe are attempting to find, develop, and implement energy solutions that are eco-friendly, economically feasible, and socially tolerable. This has been a challenging task for both policy-makers and researchers. In this specific research context, the Special Issue “Sustainable Energy and Society” is collecting texts that cover the following topics: government regulation of changes in energy systems; social and socio-cultural changes due to changes in the national energy systems; growing prosumer attitudes to energy supply and energy use; description of implemented local “green” initiatives; SME interests and participation in the alternative energy development; energy equality and energy justice across the globe and in the context of developing nations especially.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
