

## Special Issue

# Selected Papers from Volcanoes and Society: Environment, Health and Hazards Conference

### Message from the Guest Editors

An international conference entitled "Volcanoes and Society: Environment, Health and Hazards" will be held in September in Greece. The conference will provide a link between the volcanology community and emergency managers. The sessions of the meeting will focus on strategies and best practices being used and adopted by the volcanology experts in managing and distributing data. From eruptive style transitions and patterns of cyclicity in volcanic activity to urban planning and the use of geothermal energy, the meeting seeks to develop tools for improving safety and increasing the resilience of societies near volcanoes. This Special Issue will gather scientific papers presented in the session dedicated to geothermal energy and its relation to volcanism. Geothermal energy is a renewable energy source (RES) with a low environmental impact, low greenhouse gas emissions, and feasible technology providing power over time regardless of the weather conditions. This session provides the opportunity to introduce exploitation updates, breakthroughs, and innovation techniques under the perspective of geothermal energy.

### Guest Editors

Dr. Nikolaos Koukouzias

Chemical Process & Energy Resources Institute, Centre for Research & Technology Hellas (CERTH), 15125 Athens, Greece

Dr. Paraskevi Nomikou

Department of Geology and Geoenvironment, National and Kapodistrian University of Athens, 15784 Athens, Greece

---

### Deadline for manuscript submissions

closed (30 October 2021)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
