

Special Issue

Information Theory and Cognitive Agents

Message from the Guest Editors

This Special Issue aims to collect contributions that challenge those limitations by proposing new models of cognitive agents in which perception, information processing, learning, and action—in their separated or procedurally connected nature—are addressed using one among the differing IT declinations: Shannon's communication theory, control theory, statistical physics, probabilistic inference, and algorithmic complexity. Submitted proposals may refer to cognitive agents as computational emulations of specific skills, such as intelligence, engineered to solve complex problems in specific domains, or as frameworks designed to illustrate conjectures and hypotheses about specific aspects of cognition.

Guest Editors

Dr. Domenico Maisto

Institute of Cognitive Sciences and Technologies (ISTC), National Research Council of Italy, via S. Martino della Battaglia 44, 00185 Rome, Italy

Prof. Dr. Daniel Polani

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
