

Special Issue

Maximum Entropy and Its Application II

Message from the Guest Editor

The field of entropy-related research has been particularly fruitful in the past few decades, and continues to produce important results in a range of scientific areas, including thermal engineering, quantum communications, and wildlife research. Contributions to this Special Issue are welcome from both theoretical and applied perspectives of entropy, including papers addressing conceptual and methodological developments, as well as new applications of entropy and information theory. Foundational issues involving probability theory and information theory, and inference and inquiry are also of keen interest as there are yet many open questions.

Guest Editor

Dr. Dawn E. Holmes

Department of Statistics and Applied Probability, University of California, Santa Barbara, CA 93106-3110, USA

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
