# Message from the Editor-in-Chief

The main feature of *Environments* is its interdisciplinarity, linking diverse aspects into a multidimensional vision. We need a journal that provides broader pictures and visions of the present and future of our planet and its environmental dynamics; a journal that helps researchers interact, exchange ideas and projects, look far ahead, and be creative. This requires the accurate management and modelling of environmental evolution, impacts, and risks, as well as a careful look at natural capital, species protection, and ecosystem services and an examination of the perception that acceptance of diversity and biodiversity is what makes ecosystems and our societies sustainable and resilient. By publishing in *Environments*, we contribute to environmental, technological, economic, and social patterns and roadmaps for the survival and wellbeing of all species. We may help policy makers, businesses, and stakeholders understand the importance of appropriate environmental management to prevent the worsening of planetary boundaries and the decrease in wellbeing and happiness.

## Aims

*Environments* (ISSN 2076-3298) is an international and cross-disciplinary scholarly, open access journal focusing on the advances, issues and challenges related to environmental systems. Our aim is to encourage scientists and engineers to publish their experimental, theoretical, novel practical results in a variety of areas that range from environmental conservation, environmental technologies, ecosystem services, risk, policy, governance, monitoring and modelling of environmental systems, stakeholder engagement and decision support. There is no restriction on the maximum length of the papers. The full experimental details must be provided with the basic QA so that the results can be reproduced. Electronic files and software regarding the full details of the calculation or experimental procedure, if unable to be published in Word/LaTeX format, can be deposited as supplementary electronic material.

---

## Scope

- Environmental conservation
- Environmental technologies and methodologies
- Environmental protection and pollution prevention
- Environmental modeling and technology
- Environmental management and policy
- Environmental impact and risk assessment
- Environmental change and conservation
- Environmental analysis and monitoring
- Ecosystem services, biodiversity and natural capital
- Environmental economics
- Development and application of environmental data, information, tools and decision support systems

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### 2023 Impact Factor: 3.5

(*Journal Citation Reports* - Clarivate, 2024)

### Journal Rank

JCR - Q2 (Environmental Sciences) /  
CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

### Coverage by Leading Indexing Services

Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases

### Rapid Publication

A first decision is provided to authors approximately 22.8 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2024)
