

Special Issue

Environmental Toxicology of Trace Metals

Message from the Guest Editors

Trace metals have a central role in the functioning of aquatic and terrestrial ecosystems. Both essential and toxic trace metals are involved in different chemical, biological, and physical processes that determine their concentration, speciation, reactivity, and impact on the biota. Despite the recognized hazard associated with the uncontrolled release of metals in the environment and the measures to reduce their input, metals remain an important threat to terrestrial and aquatic ecosystems. Several metals were included on the list of priority substances of environmental concern, while technology-critical metals such as rare-earth metals and platinum group metals emerge as contaminants. This Special Issue invites critical reviews and research papers providing innovative insights into trace metals in the aquatic and terrestrial environments from an ecotoxicology perspective.

Guest Editors

Prof. Dr. Vera Slaveykova

Department F.-A. Forel for Environmental and Aquatic Sciences and Institute for Environmental Sciences, School of Earth and Environmental Sciences, Faculty of Sciences, University of Geneva (Uni Carl Vogt), CH-1211 Geneva, Switzerland

Dr. Giulia Cheloni

About the Journal

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy
 2. State Key Joint Laboratory of Environment Simulation and Pollution Control, School of Environment, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.7 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2024).
