

## Special Issue

# Advanced Research on Micropollutants in Water

### Message from the Guest Editor

Micropollutants have the capacity to disturb physiological processes, resulting in unfavorable neurological, immune, developmental and reproductive effects on both humans and wildlife. These substances are frequently detected in aquatic ecosystems and encompass active pharmaceutical ingredients (APIs), personal care products (PCPs), pesticides and microplastics. In natural waters exposed to sunlight (surface waters), solar-radiation-mediated degradation constitutes an important natural depuration process of micropollutants, especially those resistant to biological degradation. However, these natural processes might not be enough to remove such substances, and complementary remediation strategies must be explored. These strategies can include advanced wastewater treatment technologies, the development of best practices in agriculture and industry to reduce pollutant inputs, and policy measures to limit the release of micropollutants. This Special Issue seeks research papers dealing with advances in micropollutant detection, environmental fate and removal in waters, to provide a well-rounded and complete understanding of the topic.

## About the Journal

### Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

---

### Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy
2. State Key Joint Laboratory of Environment Simulation and Pollution Control, School of Environment, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.8 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2024).
