

Special Issue

Anaerobic Digestion

Message from the Guest Editor

At present, the term 'anaerobic digestion' refers to both a natural process and a developed technology. Although it is an old technology, the AD processing of wastes is gaining traction recently as an eco-friendly waste treatment and recycling option to produce energy and fertilizer (compost) from organic wastes along with reducing odor emissions and improving air quality. In this Special Issue, we invite authors to submit original research and review articles on all aspects of AD research including but not limited to biochemistry, ecology and physiology of AD microorganisms that enhance our understanding of the AD process, expand on current state of the art technologies of the AD process, and problems associated with AD and mitigation strategies.

About the Journal

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

Editor-in-Chief

Dr. Badal C. Saha
Retired, National Center for Agricultural Utilization Research, USDA-ARS, Peoria, IL, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) /
CiteScore - Q2 (Plant Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
