# **Special Issue**

# Advances in Multiphase Flow Meters

## Message from the Guest Editor

Multiphase flows, broadly defined as flows of one or more discontinuous phases suspended in a continuous phase, are ubiquitous in engineering and environmental problems. Due to the complexity of multiphase flows, measurement of the physical characteristics of multiphase flows remains a challenging task. This Special Issue of *Fluids* is dedicated to the recently developed, advanced techniques, e.g., electrical capacitance, ionizing radiation (X-ray, gamma, neutron), ultrasonic, electrochemical, fiber-optic and electromagnetic, for the measurement of the various characteristics of multiphase flows, such as mass flow rate, velocity, void fraction, flow regimes and temperature.

### **Guest Editor**

Dr. Ehsan Nazemi

Imec-Vision Lab, Department of Physics, University of Antwerp, B-2610 Antwerp, Belgium

## **About the Journal**

## Message from the Editor-in-Chief

Fluids (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in Fluids. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider Fluids as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

## Editor-in-Chief

Prof. Dr. D. Andrew S. Rees

Department of Mechanical Engineering, University of Bath, Bath BA2 7AY, UK

### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

## **Journal Rank:**

CiteScore - Q2 (Mechanical Engineering)
