Cold – Pressed Oils and Use of By-Products of Oil Pressing in Food Applications

Message from the Guest Editors

The cold pressing of oils is an environmentally friendly approach to their processing. The quality and safety of the obtained oils are primarily influenced by the raw material, the oil pressing and purifying process, or its storage conditions. The byproduct is a press cake, which has high nutritional value and can be a valuable component in food production. Thanks to the management of press cakes, cold pressing may be in line with a "zero waste" ideology. Currently, many research teams are conducting research related to the use of press cakes in various food applications. Researchers are creating innovative food products that use the byproducts of vegetable oils. Sharing our research results in this Special Issue can help food producers look at byproducts differently and use them in new food applications. In this Special Issue, we invite researchers to contribute original research and review articles that analyse and describe the nutritional quality and bioactive compounds in cold-pressed oils and their byproducts. Research covering the use of such byproducts in food applications is of particular interest.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
