

Special Issue

Advanced Analytical Methods for Determining the Origin of Foods

Message from the Guest Editors

With the market economy driving the development of the food industry, consumers' focus on food has gradually shifted from food safety issues to food quality and brand aspects. Especially in recent years, driven by economic interests, the problems of "food authenticity" such as species adulteration, origin fraud and shoddy food occur frequently, which has hindered the development of food production, consumption and management. With the innovation and development of food traceability technology, emerging technologies such as spectroscopy, mass spectroscopy, DNA technology, senses and omics technology have been applied in the research of food traceability and authenticity. This Special Issue will focus on the advanced technology of food authenticity and traceability, aiming to promote the development of the origin traceability and authenticity identification technology of agricultural and food products, and further safeguard the rights and interests of consumers and the market order of the food industry.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
