Recent Advances of Enzymes in Food Industry

Message from the Guest Editor

At present, food enzymes have been extensively applied in the processing of not only traditional food, such as brewing, dairy, baking, meat, and bean products, but also some novel food products, such as artificial meat, specific structural lipids, rare sugar, and so on; however, not all food enzymes can meet the critical requirements of industrial applications, partly due to their low activity, insufficient stability, low yield, and inadequate use methods, limiting their application in the food industry. Hence, the engineering of food enzymes may address the issues associated with the disadvantages of enzymes in the food industry. For this Special Issue, unpublished original contributions, critical review articles, and short communications in the related areas of food enzymes are welcome, which may include fundamental science or practical applications. Potential topics include, but are not limited to, the keywords below.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
