

Special Issue

Advances in Sensory Analyses of Novel Foods

Message from the Guest Editor

In recent years, there has been increasing evidence that functional foods, food components, and bioactive molecules of plant, animal, and microbial origins can offer significant health benefits. However, from a market perspective, consumer acceptance, which includes habits, preferences, and dietary behaviors, is crucial alongside health-promoting properties. To this end, new methods for the sensory evaluation of novel foods are being developed to best match the quality of new foods to consumer expectations and requirements. For this reason, this Special Issue from the journal *Foods* is being published, focusing on modern methods of the sensory evaluation of new foods. It will place particular emphasis on research related to advanced sensory evaluation methods. Additionally, submissions promoting functional foods are welcome. We invite the submission of both original research and review articles on topics including but not limited to the following: New methods of sensory evaluation; The critical assessment of existing sensory methods; The design of new food products with the addition of biologically active substances; Insect-based functional foods.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
