Advanced Research in Foodborne Microorganisms: Detection, Control, Risk Assessment and Prevention Volume II

Message from the Guest Editor

Microorganisms and food have been linked since humans first started to examine the role and aspects of human nutrition. Depending on their nature, microorganisms may constitute:

- A threat to the health of consumers;
- A cause of food spoilage and food waste;
- A necessary and indispensable element in the production of food.

Regardless of their nature, though, their relationships with the food that carries them are studied in terms of microbial ecology in order to better understand them. Their identity is increasingly well established and their function, as well as their ability to withstand the conditions of food production and even to communicate with each other, increasingly deciphered. This better knowledge of their properties must continue and be used to, where appropriate, prevent their transfer to food, detect and control them, but also assess them in terms of public health risks.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
