Determination and Assessment of Macro, Trace Elements and Toxic Heavy Metal Content in Foods: 2nd Volume

Message from the Guest Editor

Currently, the relationship between exposure to contaminants in humans and food is unquestionable. Therefore, monitoring the presence of these pollutants throughout the food chain is, today, of great importance for the health of the population. Heavy metals, macroelements, microelements and trace elements continue to be among the most important pollutants for human health. We are what we eat and therefore, continuous monitoring of compliance with the laws in force in each country, it must be one of the primary objectives of the authorities and scientists in our area of work. However, we cannot forget that due to the behavior as hormetins of many of the macroelements and trace elements that we study, it is also important to determine the contribution to the recommended daily doses of these elements to verify that there is no possibility of imbalance. in the concentrations of these elements in humans could affect our health. Our goal is to help improve the knowledge that these pollutants in our trophic chain.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
