

Special Issue

Discovery and Valorization of New Food Matrices

Message from the Guest Editors

The world of food chemistry is increasingly moving towards the discovery of new food sources characterized by a rich nutritional profile as well as safety for the consumer and environmental sustainability. This aim can be achieved through different approaches, such as considering the food application of a certain biological compounds never used for this purpose, applying a new production processes to "classic" food matrices, and isolating single compounds or mixtures to be used as food ingredients or supplements. The present Special Issue will gather papers that cover innovative trends in this field, namely the characterization of the chemical, nutritional, and safety profiles of innovative and/or potential food matrices; the development of production and post-production approaches to change and/or improve the nutritional profile of food matrices; and the isolation of single compounds or mixtures to be used as food ingredients or supplements. All these new food sources will be considered from both the chemical and biological points of view.

Guest Editors

Prof. Dr. Luisa Mannina

Dipartimento di Chimica e Tecnologie del Farmaco, Sapienza Università di Roma, Piazzale Aldo Moro 5, Rome, Italy

Dr. Mattia Spano

Department of Chemistry and Technology of Drugs, Sapienza University of Rome, Piazzale Aldo Moro 5, 00185 Rome, Italy

Deadline for manuscript submissions

28 February 2025

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
